

ASIM AYDIN

JUNIOR FULLSTACK DEVELOPER

ABOUT ME

+90 538 420 06 81 · asimaydin.dev@gmail.com · [Linkedin](#) · [Github](#) · [Giresun/Türkiye](#)

I've been passionate about computers since an early age, which naturally led me to explore the world of software development during high school. I graduated from a Computer Technical Service program and continued my studies in Computer Programming at university. Throughout this journey, I've developed a strong curiosity and genuine interest in creating things through code. I'm still early in my career, learning and improving every day, but I'm determined to build a solid path in the software industry. With patience, consistency, and a problem-solving mindset, I'm working step by step to grow as a developer and turn my passion into a long-term career.

STRENGTHS AND EXPERTISE

Languages: HTML, CSS, Javascript, TypeScript

Frameworks and Technologies: React, Vite, Bootstrap, Tailwind, Node.js, Express, Prisma ORM, PostgreSQL, Git, Github

AI Tools / AI Assistants: GitHub Copilot, ChatGPT, Gemini, Claude

Soft Skill: Strong communication skills, Problem-solving ability, Eager to learn, Responsible and reliable

PROJECTS

Ojs Nutrition | [Code](#) | [Live View](#)

- **Technologies:** React, Vite, TypeScript, Tailwind
- *Developing a responsive e-commerce frontend based on a Figma design. Building reusable, data-driven React components with TypeScript and styling with Tailwind CSS. Project is ongoing—some sections and interactions are still in development.*

Starbucks Clone | [Code](#) | [Live View](#)

Technologies: HTML, CSS, Bootstrap

- This project is a clone of Starbucks' official website, developed using Bootstrap 5, HTML, and CSS. It aims to provide a similar user experience by emulating Starbucks' modern and responsive design.

Amazone Clone | [Code](#) | [Live View](#)

Technologies: HTML, CSS, Bootstrap

- This project is a clone of Amazon's official website, developed using Bootstrap 5, HTML, and CSS. It aims to provide a similar user experience by emulating Amazon's modern and responsive design.

Forum28 – Blog/Forum API (Learning Project) | [Code](#) | [Live View](#)

Technologies: Node.js, Express, TypeScript, PostgreSQL, Prisma ORM, JWT, Argon2

- A personal learning project to practice backend development fundamentals. Implemented user authentication (login/logout), JWT-based protected routes, and full CRUD operations for blog posts. Built with clean Express structure and Prisma ORM. This project is not production-ready but serves as a hands-on playground to understand REST APIs, database modeling, and secure password handling. Open to future improvements.

Star Wars Character Filtering Project | [Code](#) | [Live View](#)

Technologies: HTML, CSS, Bootstrap, Javascript

- I developed a project where users can filter Star Wars characters based on various criteria such as name, species, and affiliation (Jedi, Sith, etc.). This application was built using HTML, CSS, and JavaScript, providing a user-friendly interface. It includes dynamic search and filtering features that allow users to easily navigate through the Star Wars character database.

WORK EXPERIENCE

Customer Service Representative

December 2021 - February 2023

Türk Telekom – Internet Technical Support & TV Subscription Department

- Provided support for internet connection issues and technical troubleshooting.
- Assisted customers with Tivibu cancellation requests and service-related inquiries.
- Delivered customer-focused solutions while maintaining service quality and satisfaction.
- Gained experience in handling various customer needs in a fast-paced environment.

Giresun Provincial Directorate of Migration Management

March 2024 - August 2024

Worked at the Giresun Provincial Directorate of Migration Management, where I gained valuable experience in migration-related processes and administrative tasks. During my 6-month tenure, I assisted in various projects and contributed to improving the efficiency of internal operations. Collaborated with a diverse team, helping manage and streamline services provided to migrants and refugees in the region.

EDUCATION

Ordu University | Computer Programming

October 2018 - June 2020

Classes: C#, Mathematics For Programs, Open Source Operating Systems, Database Management, Advanced Web Development, Algorithms

OnlyJS Academy | Full Stack Development Trainee

December 2024 - October 2024

I am currently advancing my skills at OnlyJS Academy as a Junior Full Stack Developer.

On the frontend, I focus on building modern, responsive, and user-friendly web interfaces using HTML, CSS, JavaScript, TypeScript, React, Tailwind CSS, Bootstrap, and Vite.

On the backend, I am expanding my knowledge of Node.js, Express, NestJS, Prisma, and PostgreSQL, learning how to design and manage APIs and databases effectively.

With a passion for coding and continuous improvement, I aim to create complete, well-structured, and scalable web applications that provide great user experiences.

Classes&Technologies: HTML, CSS, JavaScript, TypeScript, React, Tailwind CSS, Bootstrap, Vite, Node.js, Express, NestJS, Prisma, PostgreSQL

LANGUAGES

Turkish (Native) , **English** (Basic)
